

Game Rules (10/03/2023)

Note: Jiggly Cash video slot is referred to as Jiggly Cash, The Game or Game.

- Jiggly Cash is a 6x5 video slot. The game features Scatter pay win, Avalanche feature, Multiplier feature, Mystery feature and a Bonus Game with Free Spins and Retriggers. The theoretical return to player is 92.15%.
- A game round is started with the action button and plays the game with the selected bet level.
- Auto play plays the game automatically for the number of game rounds selected in the auto play page. This feature may not be available.
- All game payout and win combinations are paid out according to the pay table.
- All wins are presented and paid out in the selected currency.
- 8 or more identical symbols (except Bonus, Multiplier and Mystery symbols) anywhere in the game area will constitute a Scatter pay win. The size of the win is dependent of the number of identical symbols. Winning symbols will be removed and trigger the Avalanche feature.
- The Avalanche feature is triggered when a Scatter pay win is won. Winning symbols will be removed and all empty positions on the game area will be replaced with new/or existing symbols that are dropped from above. The Avalanche feature continues as long as there is a new win. The wins will be additively accumulated throughout the Avalanche feature and the total win will be paid out at the end of the Avalanche feature.
- The Multiplier feature is activated if a win occurs in immediate proximity (horizontally or vertically) to a Multiplier symbol.
 - Each activated Multiplier symbol will be removed from the game area and its value will be added to the current total multiplier value. For example a Multiplier symbol with a multiplier of 25x and one with a multiplier of 5x will give a total multiplier of 30x. The current total multiplier value is displayed in the area above the reels. Multiplier levels: 2x, 3x, 5x, 10x, 25x, 50x, 100x, 250x.
 - If any multipliers have been activated during the Avalanche feature, then the combined win amount of the Avalanche feature will be multiplied with the current multiplier value at the end of the Avalanche feature. The multipliers are retained throughout the Avalanche feature. After the total win has been calculated and paid out, the multiplier is reset.
- The Mystery feature is activated if a win occurs in immediate proximity (horizontally or vertically) to a Mystery symbol.
 - If a Mystery symbol is active during the Avalanche feature and before any Scatter pay wins have been calculated, the Mystery feature will select a random low paying symbol and transform all current instances of that symbol (including itself) into a random mid paying symbol (Jiggly yellow, green, purple or blue) or the high paying symbol (Jiggly red) according to the pay table.
- 3 Scatter symbols landing anywhere on the reels in the game area will trigger or retrigger the Bonus Game, awarding 10 or 5 free spins respectively. Any active multipliers from the main game will be reset when the Bonus Game is started.
 - In the Bonus Game, all activated multiplier values are added together and stored in the area called JIGGLYBANK for the duration of the Bonus Game. In order for the multiplier to be applied at the end of an Avalanche feature, it is required that the Multiplier feature is activated at least once during the Avalanche feature.
- The Bonus Game is played with the same bet as the spin that triggered the Bonus Game.
- No bets can be altered during a game round.
- In the event of game malfunction all affected bets and pays are rendered void.
- All wins during a game round are added and presented at the end of the game round.
- The maximum total bet multiplier for one game round is 10000. If this limit is reached the game round will be terminated and no additional wins will be paid out.

- A feature buy option may be purchased at a cost that is a multiple of the current bet size. A purchase starts a spin with an outcome that triggers the Bonus Game. Theoretical RTP is 92.46%. All outcomes from a feature purchase pays according to the pay table and in relation to the bet size. The feature buy functionality may not be available in all markets.

Button	Function
	Click to start a game round. On desktop you may also press the space bar on your keyboard. This is the action button.
	Skip presentation.
	Quick stops the symbol area.
